## Letter of Certification: S100-R4-Pbf RoHS<sup>[1]</sup> Compliance

While Automation Modules Inc. (AMI) does not manufacture any individual electronic components, we do use them in the construction of our products. AMI has obtained documents from these component manufacturers certifying that said components are RoHS compliant. AMI has also obtained documents from our contract manufacturers stating that RoHS compliant procedures and materials are, or were, used in the assembly of our product. By virtue of these, AMI certifies that the S100-R4-PbF is RoHS compliant.

RoHS compliance of the S100-R4-PbF can be identified by a marking on the outside of the finished product and by a similar marking, as well as date code, on the internal printed circuit board.

A handwritten signature in black ink that reads "Kent Lachner". The signature is fluid and cursive, with a long horizontal stroke at the beginning.

Kent Lachner, President.
